Re: Application of BellSouth Telecommunications, Inc. to Provide In-Region
InterLATA Services Pursuant to Section 271 of the Telecommunications
Act of 1996
Docket No. 2001-209-C

Dear Mr. Terreni:

Enclosed please find BellSouth Telecommunications, Inc., d/b/a AT&T South Carolina's filing of the proposed Data Notification Report for the March 2010 data month.

Thank you for your attention to this matter.

Sincerely,

A handwritten signature in black ink, appearing to read "Patrick W. Turner", written over a horizontal line.

Patrick W. Turner

Enclosure

cc: All Parties of Record

PROPOSED MARCH 2010 DATA NOTIFICATION

BellSouth Telecommunications, Inc., d/b/a AT&T South Carolina ("AT&T") is considering making the changes described in this document to generate results for the March 2010 data month. Results for the March 2010 data month will be posted as follows:

Preliminary results	April 20, 2010
Final results	April 30, 2010

AT&T provides Data Notifications each month in compliance with the SQM Plan. The Plan specifies that when AT&T proposes making any changes to the methods by which performance data is calculated, it must provide written notice. The notice is provided on the first business day of the month before the data month in which the change will be made. The Plan also requires AT&T to provide notification if it is considering making changes to the method of calculating data for the following month.

ENCORE Releases may affect monthly data flows from the source systems (e.g., LASR, LESOG, etc.) that PMAP uses to calculate measurements. AT&T will make changes to PMAP to ensure that data continues to be correctly captured as ENCORE Releases are implemented.

System releases may affect monthly data flows from the source systems that PMAP uses to calculate measurements. AT&T will make changes to PMAP to ensure that data continues to be correctly captured as system changes are implemented.

There is one additional matter that AT&T would like to bring to the attention of the Commission and the parties.

On the filed November 2009 Data Notification, AT&T provided notice that it would modify the code in accordance with the exclusions to exclude retail partial port administrative orders. Although AT&T expected to make this change with November 2009 data, it will be implemented with December 2009 data instead. (RQ10381)

Ordering Measurements

(1) *Affected Measures:* RI, FOCT, FOCC

O-8 Reject Interval [RI]

O-9 Firm Order Confirmation Timeliness [FOCT]

O-11 Firm Order Confirmation and Reject Response Completeness [FOCC]

Description of Change: Currently, service requests receive errors due to undetermined state code assignments. AT&T proposes to modify the code to accept transactions with undetermined state code assignments. This proposed change was not listed on the filed Preliminary March 2010 Data Notification. (RQ10650)

Impact of Change:

For the October 2009 data-month in Florida, the Reject Interval CLEC metric for the Non-Mechanized disaggregation would change from 99.44% to 99.45%. Due to the impact of this change, re-posting is not necessary.

For the October 2009 data-month in Florida, this change will have no impact to reported metric results for the Firm Order Confirmation Timeliness CLEC metric. Due to the impact of this change, re-posting is not necessary.

For the October 2009 data-month in Florida, this change will have no impact to reported metric results for the Firm Order Confirmation and Reject Response Completeness CLEC metric. Due to the impact of this change, re-posting is not necessary.

(2) *Affected Measures:* RI, FOCT, FOCC

Affected States: GA, TN, KY

O-8 Reject Interval [RI]

O-9 Firm Order Confirmation Timeliness [FOCT]

O-11 Firm Order Confirmation and Reject Response Completeness [FOCC]

Description of Change: Currently, AT&T does not accept number portability type codes of “D” (local routing number). AT&T proposes to modify the code to accept number portability type codes of “D” (local routing number). This

proposed change was not listed on the filed Preliminary March 2010 Data Notification. (RQ10344)

Impact of Change:

For the May 2009 data-month in Georgia, the Firm Order Confirmation Timeliness CLEC metric for the Fully Mechanized disaggregation would change from 100.00% to 99.93%. Due to the impact of this change, re-posting is not necessary.

For the May 2009 data-month in Kentucky, this change will have no impact to reported metric results for the Firm Order Confirmation Timeliness CLEC metric. Due to the impact of this change, re-posting is not necessary.

For the May 2009 data-month in Tennessee, this change will have no impact to reported metric results for the Reject Interval CLEC metric. Due to the impact of this change, re-posting is not necessary.

Provisioning Measurements

(3) *Affected Measures:* SOA

P-11 Service Order Accuracy [SOA]

Description of Change: Currently, the SOA code compares all fields of a pre-wiring order to the LSR. These service orders should only be graded for Account Telephone Number (ATN) and Service Address. AT&T proposes to modify the code to limit grading criteria for pre-wiring orders to only these service affecting fields. This proposed change was not listed on the filed Preliminary March 2010 Data Notification. (RQ10347)

Impact of Change: For the October 2009 data-month, the CLEC metric for the UNE disaggregation would change from 97.66% to 97.90%. Due to the impact of this change, re-posting is not necessary.

(4) *Affected Measures:* SOA

P-11 Service Order Accuracy [SOA]

Description of Change: Currently, the SOA code incorrectly compares the accompanying FID data from certain USOCs on the LSR to the accompanying FID data from the same USOC on the service order. The SOA code logs the FID data as an error even if the LSR FID data matches the service order FID data. AT&T proposes to modify the code in accordance with the business rules to correctly compare the accompanying FID data on the LSR and the service order. This proposed change was not listed on the filed Preliminary March 2010 Data Notification. (RQ10356)

Impact of Change: For the July 2009 data-month, the CLEC metric for the Resale disaggregation would change from 94.71% to 94.81% of orders that are accurate. Due to the impact of this change, re-posting is not necessary.

Billing Measurements

(5) *Affected Measures:* BEC

B-10 Percent Billing Adjustment Requests Responded to within “x” Business Days [BEC]

Description of Change: Currently, AT&T uses both the status and resolution/referred date to determine if the record has missed its benchmark. AT&T proposes to simplify the code to use the resolution date or referred date to determine if the record has missed its benchmark. This proposed change was not listed on the filed Preliminary March 2010 Data Notification. (RQ10643)

Impact of Change: This change will have no impact to reported metric results. Due to the impact of this change, re-posting is not necessary.
